

**LLogisticNET : Documents management system for Freight Forwarders ...**

The Freight forwarders under the shipping logistic industry has high requirement for documents management.

Many freight forwarding companies faced with challenging task of generating documents consist of Booking Confirmation, HBL, Shipping Instruction, ROT, Pre-Invoice, Air Way Bill, Truck Arrangement and etc from Excel and Word templates.

**Problems encounter using Excel or Word ..**

- Time consuming
- Need to re-key in all data again to produce for different reports for different purposes
- Not real time
- Searching inefficiency
- Can't share file across different department or branches
- Management inefficiency due to large numbers of files
- Security control problem

**Why choose LLogisticsNET ..**

- Web based system
  - No workstation Installation needed
  - Able to access anytime anywhere in the world
  - Centralized database
- Cost efficiency
- Using Microsoft .Net 2.0 Technology
- Easy to learn and use

**What we can help you with LLogisticNET ...**

- Cover full freight forwarding modules which include Sea Import/Export, Air Import/Export.
- User customizable job number format based on job type (auto-running)
  - Sea Import
    - Release DO
    - Forwarding
  - Sea Export
  - Air Import
  - Air Export
- Maintenance of shippers, shipping companies, consignees, forwarding agents, notify pty, agents, haulers and also keeping of contact details
- Managers can get real-time shipment information as soon as data is entered into the system

- Upload custom forms or other documents and share across different departments or branches
- Able to convert document to PDF and e-mail to customers.
- Automatic e-mail notification when new jobs are created
- Replicate information to creating new jobs
- Integrate with fax server – save time to print out and fax over; now user just need to fax from their pc
- Control the accessibility of information belonging to salesmen while managers are allowed to see all salesmen's quotations
- User-customizable quotation formats (user-defined formats).
- Able to share data across different branches.
- With the system-wide advanced search function, it allows to searching according to shippers, consignees, POLs, PODs, Container Number, job types, job numbers, master numbers, house numbers and statuses.

**ROI calculation ...**

LLogisticNET cost RM 5,000.00 (3 concurrent users). RM 500.00 per additional users.

We assume that there are 4 workers where each having average salary of RM 2000.00

Having the system, each worker would become more efficient by 1 hour each day and 1 hour is equivalent to RM 12.50.

So 4 workers would save the company RM 50.00 per day and thus one month would accumulate to RM 1,000.00 and customers can get their ROI in just 6 month!!!!

**Feature listings ...**

- **Sea Export**
  - Booking Confirmation
  - HBL
  - Shipping Instruction
  - ROT
  - PreInvoice
  - Status Maintenance
  - Truck Arrangement
  - Sea Export Status Task List
